

Aluminium Louvre Awnings

Great weather protection with Aluminium Louvre Awnings

Aluminium Louvre Awnings are light and durable and are an ideal way to control privacy whilst at the same time not obstructing air flow or the view. Aluminium Louvre blades reflect up to 90% of the heat normally transmitted through a window, which can significantly reduce the energy costs for your home.

By choosing an adjustable louvre, with either internal or external operation, you have the luxury of controlling the amount of light, heat and privacy you require by manually adjusting the louvre panels.

Available in a range of standard or custom power-coated colours, Aluminium Louvre Awnings provide a stylish modern finish to your home.

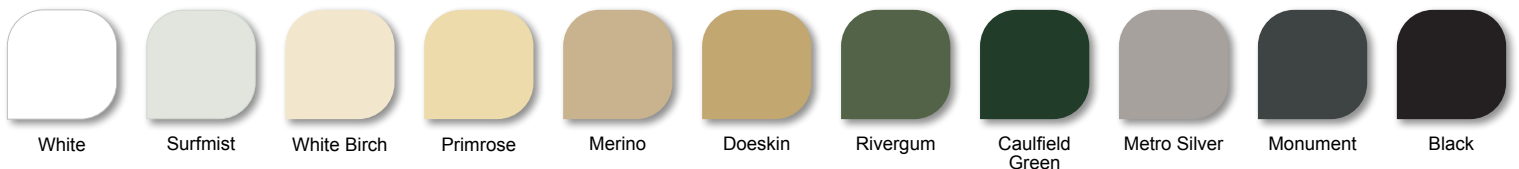

A MODERN DESIGN WITH CONTROL FLEXIBILITY.

Adjust the amount of light, heat and privacy in your home.

Features & Benefits

- Protection from the elements: Aluminium Louvre Awnings provide protection from the sun, wind and rain keeping your house cool in the summer and warm in the winter.
- Easy panel replacement: Should any of the panels become damaged, the design provides for easy panel replacement without removing the awning.
- Three variations: You can choose from standard open pitch, closed pitch or adjustable louvres with internal or external controls.
- Extensive colour range: With a large range of standard colours to choose from or powder coated to match your existing colour scheme, combined with the ability to mix and match panels, you can create a unique look for your home.
- Complete weather protection: No eaves? Aluminium Louvre Awning top covers are available for complete weather protection for your windows.
