

FIXED CANOPY METAL AWNINGS

Fixed Canopy Steel Awnings provide an attractive low-cost shelter to the damage caused by Australia's harsh climate. They are ideal to protect entry ways, windows or patios.

Produced from multi-rib cross-section Tru-steel panels, its rigid strength provides greater wind resistance and protection against hail and storm damage*.

Fixed Canopy Steel Awnings are available with either self supporting arms or post supports.

With our large range of Colorbond colours to choose from and the ability to mix and match panels, you can create a unique look suited to both domestic and commercial applications.

Features & Benefits

- **Extensive colour range:** With our large range of Colorbond colours to choose from and the ability to mix and match panels, you can create a unique look for your home.
- **Durable components:** Colorbond steel components and Tru-steel panels ensure a robust and long lasting awning.
- **Long lasting and low maintenance:** Ideal to protect entry ways or patios from the elements.
- **Two types of side styles:** Available with standard straight side trim panel or decorative scalloped closed sides.

BLINDS • AWNINGS • SECURITY

*Please note: Fixed Canopy Steel Awnings are not completely weatherproof.
