Type of mesh

Decorative Doors come standard with ArmourX.

- **ArmourX**® – the superior stainless steel security mesh on the market.

Large range of colours

Our Decorative Doors are available in a large range of standard colours, however, special powdercoated colours are available on request as an optional extra.

Optional extras - Decorative Doors are available with the following options:

- **Reojamb (anti-jemmy device)** – If a hinged security door is forced or jemmied, the timber door jamb is likely to split – compromising your security. To solve this problem we created Reojamb – an anti-jemmy device structured to improve the strength and security of your existing door jamb. Reojamb is installed from top-to-bottom of the entire door height on your door jamb which helps to distribute any impacts, reinforcing the whole door. Made from heavy gauge aluminium, Reojamb will blend unobtrusively with your security door.
