Panel Glide Blinds

Contemporary by design, perfect for sliding doors and bi-fold doors.

Our Panel Glide system provides a contemporary method of obtaining privacy and sun protection in both domestic and commercial installations. This new and innovative shading solution for large windows, sliding doors and bi-fold doors, looks fabulous in ultra modern or traditional interior design schemes.

What makes the Panel Glide Blind so unique is the wide panels that effectively reflect and filter daylight. When open, the panels stack neatly behind one another allowing maximum light into the room. Sliding the panels into the closed position creates a complete fabric screen providing light control and increased privacy.

Panel Glide Blinds will transform any room with its cultured, sophisticated look. Select from our huge range of quality blockout or translucent light filtering fabrics, giving you better light control and enhancing your room's ambience.

Can be mixed with Roman Blinds and Roller Blinds in the same room.

An innovative method to obtaining privacy.

Easy-to-use glide system that's suited for sliding & bi-fold doors.

Features & Benefits

- Blockout, light filter & sunscreen fabric: Set the tone of the room with colour, mood and light control.
- Tracking system: The benefit you get from the roller mounted carrier system is a lightweight blind that is easy to operate. The track is very slim and discrete.
- Optional aluminium battens: You have the option to add aluminium battens. Create the look you want for your home, either casual or formal.
- Removable panels: You can change the colours of your panels to give your home a new look simply and easily, whenever the mood takes you.
- Optional Pelmet: Add a touch of elegance to your Panel Glide with our exclusive pelmet. The pelmet infill is co-ordinated with your chosen Panel Glide fabric and provides a stylish modern finish for your room.
