

ALUMINIUM PRIVACY SCREENS

Franklyn Aluminium Privacy Screens are a modern, seamless design that will add value to your home. Suited to gate features, presentation walls, fencing and privacy screening, they are often used as features or highlights in modern architecture.

Aluminium Privacy Screens are available in either flat or louvred styles with 65mm elliptical slats. Flat style Privacy Screens come with a choice of 10mm or 20mm spacing depending on the level of privacy required.

A unique alternative to timber, aluminium is weather resistant and will not splinter, flake, peel, corrode, discolour or warp.

Features & Benefits

- **Made of durable, weather-proof aluminium:** requires no on-going maintenance saving you time and money.
- **Extensive colour range:** Choose from our large range of powdercoated colours. Colours include an imitation "wood" effect.
- **Firm locking system:** No unsightly welding joins or open channels which can collect dirt and leaf debris.
- **Two angle styles:** You can choose from either flat or louvred style (30° degrees).
- **Choice of blade spacing:** 10mm or 20mm (flat).
- **Choice of frame:** available in full frame or partial frame.
- **Slat size:** available in 65mm elliptical slats.

In some instances, Privacy Screens may need to meet certain local Council specifications. For more information contact your relevant local Council.
