

STAINLESS STEEL

FLY SCREEN

- KEY BENEFITS**
- ✓ Maximum Airflow
 - ✓ 304 stainless steel mesh
 - ✓ Bushfire rated - can be used up to BAL 40.
 - ✓ More durable product
 - ✓ Easier to clean

Franklyn locally manufacture modern fly screens using 304 stainless steel mesh which is proven to last against our harsh Australian sun. Using 0.6mm thick stainless steel woven mesh means these fly screens are sturdy and easier to clean with a vacuum or sponge without ripping like older style fibreglass fly screens. **Note: This product is not a security screen.**

*Available in windows, hinged doors, sliding doors and stacker doors, all in a wide range of standard colours.

Frame Colour Range

Anodic Natural Matt	Ultra Silver Gloss	Surfmist Matt	White Birch Gloss
Woodland Grey Matt	Primrose Gloss	Paperbark Satin	Bronze Anodised
*Colours are indicative and may appear different on paper, or on screen compared to the actual product.
